This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

TABLE OF CONTENTS.

	Pages.
Illustration of use of signals, International Code	VII
Illustration of different rigs	XXI
Part I. Sea-going vessels (national and merchant) arranged in the order of signal groups	1–51
Part II. Sailing vessels alphabetically arranged	52–263
Part III. Steam vessels alphabetically arranged	265–344
Part IV. List of iron and steel vessels	345–353
Part V. List of unrigged vessels	355–391
Part VI. Government vessels:	
Vessels of the United States Navy	397, 398
Vessels of the Quartermaster's Department	401
Vessels of the Engineer Department	405–406
Vessels of the Mississippi and Missouri River Commissions	409
Vessels of the Revenue-Marine Service	413, 414
Vessels of the Light-House Service	417
Vessels of the Coast and Goedetic Survey	421
Vessels of the United States Fish Commission	421

PREFACE

TREASURY DEPARTMENT, BUREAU OF NAVIGATION,
Washington, D. C., October 10, 1887.

SIR: In compliance with the provisions of the act of Congress approved July 5, 1884, establishing the Bureau of Navigation and directing the Commissioner of Navigation to "annually prepare and publish a list of vessels of the United States belonging to the commercial marine, specifying the official number, signal letters, names, rig, tonnage, home port, and place and date of building of every vessel, distinguishing sailing vessels from such as are propelled by steam or other motive power," the nineteenth annual list of such vessels is herewith submitted, it being the fourth annual list prepared by the Bureau of Navigation, and bringing the record of the merchant vessels of the United States down to June 30, 1887.

The statement embraces 24,776 vessels of all classes, the names of which have been ascertained, distributed as follows:

Sailing vessels, 16,284.

Steam vessels, 5,692.

Unrigged vessels, 2,800.

The volume contains a separate list of the iron vessels belonging to the country, and foot-notes are added indicating the vessels whose names have been changed under the act of March 2, 1881.

Tables showing the signal flags, and illustrating their uses under different circumstances; an explanation of the system known as "the international code of signals" and "the manner of employing flags in signaling," and diagrams explaining distance signals and their manner of employment, and the rigs of vessels, are embodied in the volume.

Special attention is invited to the columns giving the dimensions of the vessels.

Signal letters are assigned to all sea-going vessels of one hundred tons or upwards. Upon application made through a collector of customs they will be granted to yachts, and, in particular cases, to other vessels, if necessary. Such letters are requisite in order to afford the means of recognition by signals at sea. To facilitate a ready reference to the signals, the list of sea-going vessels, arranged alphabetically in the order of their signal letters, is placed first in the book. (*See Part I.*) Signal letters have been assigned to 3,746 of the vessels named in the list, exclusive of vessels belonging to the Government.

The Bureau has revised the entire work, and the record of every vessel returned by the different custom-houses has been compared with the previously published list, and all changes mentioned have been noted and entered. The names of vessels lost, whose papers have been surrendered, have been stricken from the list.

diagram"; and it is by a combination of 2, 3, or 4 flags in one hoist that arbitrary signs are made which represent words and sentences of the same meaning in all languages.

The Signal-book which accompanies the Code is arranged in five parts, so that the combinations of flags forming the entire series of signals from B, C to F, G, M, D follow in consecutive order, and must be sought for accordingly in deciphering a signal.

Part I contains the 2-flag and the 3-flag signals of such words and sentences as are required for communications and inquiries in ordinary signaling; also the geographical and numeral signals.

Part II is the index to signals in Part I, many additional 4-flag signals being added. It is consulted when making a signal.

Part III contains boat signals and distance and semaphore signals.

Part IV contains regulations for preventing collisions at sea, warning and pilot signals.

Part V is the Code list of vessels. The four-letter combinations, from G, Q, B, C to W, V, T, S, are reserved for this purpose. Signals from G, Q, B, C to G, W, V, T—1,440 combinations—are appropriated to men-of-war and Government vessels, and H, B, C, D to W, V, T, S—53,040 combinations—are used for merchant ships of each nationality. The ensign, which must be hoisted at the peak, denotes the nation in whose ship-list the name answering to the signal letters is to be found, and the Code Pennant, hoisted under the ensign, indicates that the "International Code" is to be used.

SIGNALING.

Flags for making a signal should be hoisted at the mast-head, or where best seen.

The Code Pennant and Pennants C and D alone are used singly, and have the following significations:

The Code Pennant is the answering pennant.

The Pennant C is Yes.

The Pennant D is No.

The above are the only signals *made with single flags*. The *two*, *three*, and *four* flag signals have each a distinct signification, which is further indicated by the character of the top flag, thus:

Signals of 2 flags, with the *Burgee* uppermost, are Attention signals; with a *Pennant* uppermost, Compass signals; and with the *Square flag* uppermost, Danger or Distress signals.

Signals of 3 flags relate to general subjects of communication, including latitude, longitude, and time.

Signals of 4 flags, with the *Burgee* uppermost, are Geographical signals; with the *Pennant C*, *D*, or *F* uppermost, are spelling or Vocabulary signals; with the *Pennant G* uppermost, are names of men-of-war; and with a *Square flag* uppermost, are the names of merchant ships.

It is not expected that the range of signals will allow the use of a special token or signal for each merchant vessel and each man-of-war of separate nations; and, in case of the same group being assigned to two vessels of different nationalities, the nationality of the vessel can be determined by her ensign, which must, *in all cases*, be first hoisted, and which will indicate the nation in whose ship-list the name answering to the signal is to be found.

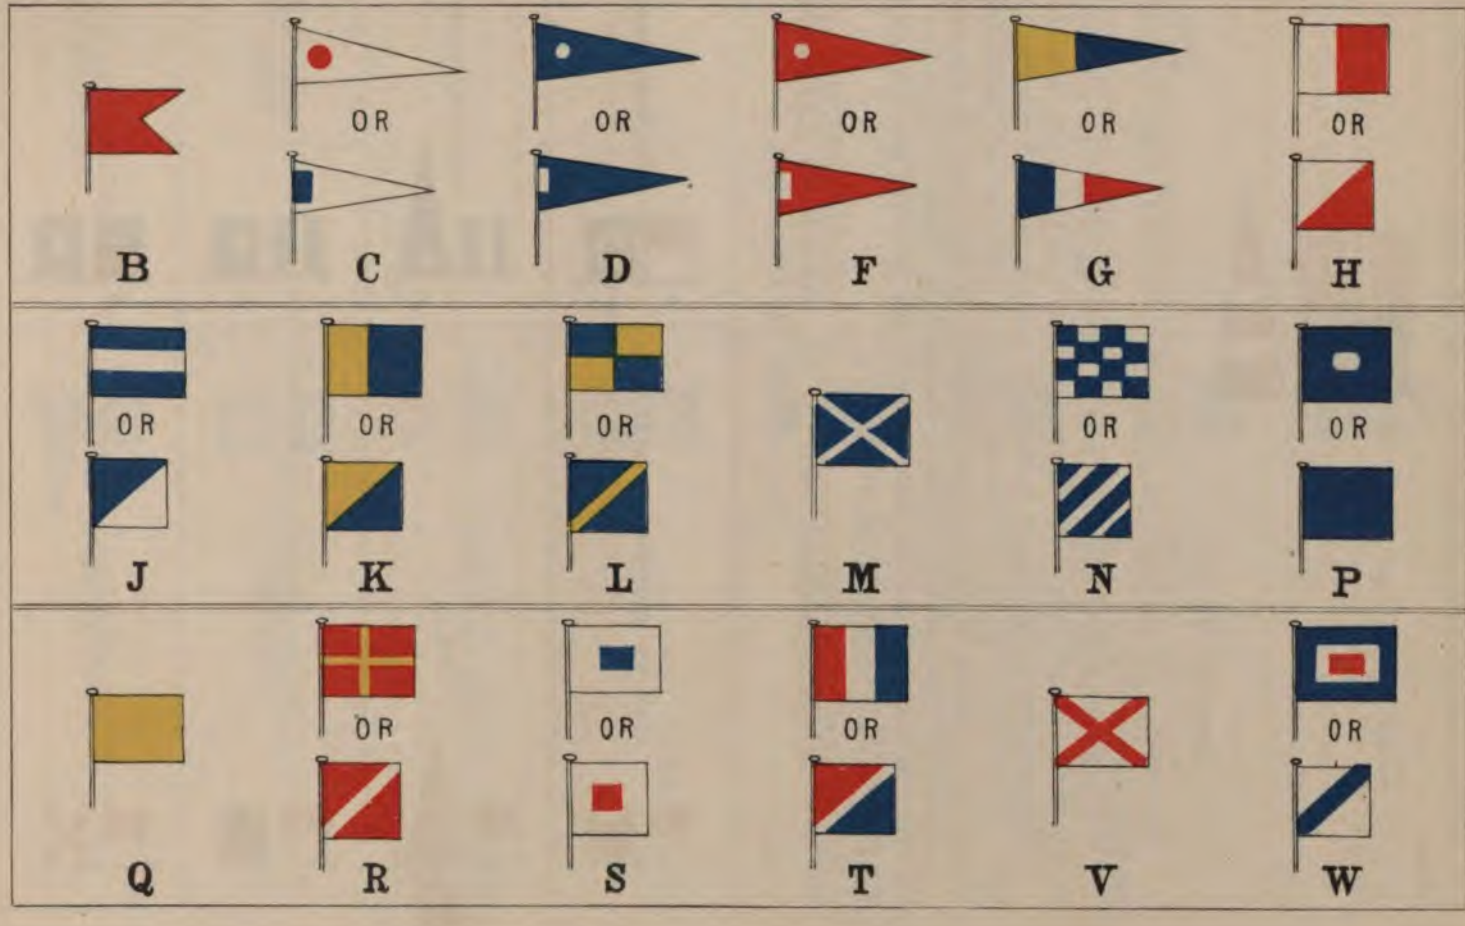
When a signal is seen and no national ship-list corresponding to the ensign shown is at hand, the signal, the nationality, the latitude, the longitude, and the date should be recorded for further communication or reference.

Some examples illustrating the manner of displaying the flags (in a hoist) are introduced from the official danger or distress signals used by the United States Coast Signal Service, followed by the signals used at the Life-Saving Stations and the "cautionary storm signals":

"CODE SIGNAL" and "ANSWERING PENNANT."

A

N. B.—When used as the "Code Signal," this pennant is to be hoisted under the ensign; when used as the "Answering Pennant," where best seen.



To open communication by this Code, show the ensign with the following pennant under it, thus:

This signal is acknowledged on the coasts of the United States by showing the same pennant (as given above) *alone*.

This pennant, hoisted alone, also means, when signaling, "Signals seen and understood," and is to be shown in answer to every signal as soon as such signal has been seen and recognized.

Communication may then be commenced, and any message following in this paper, or found under the heading "Danger or Distress" in the International Code Signal-book, may be exchanged, strictly following the INTERNATIONAL COMMERCIAL CODE and the instructions here given below.

The above signal, asking to open communication, should be shown in every case of distress by the shore station, for it may be that the vessel has the INTERNATIONAL CODE, but, until seeing this signal, will not know she can use it.

SIGNALS ADOPTED FROM AND TO BE FOUND IN INTERNATIONAL COMMERCIAL CODE SIGNAL-BOOK.

	Want immediate assistance.		Engine or machinery disabled.
	We are coming to your assistance.		You are standing into danger.
	Do not attempt to land in your own boats.		Heavy weather coming; look sharp.
	Damaged rudder; cannot steer.		Bar impassable.

	Cast off.		Landing is impossible.
	Make fast.		Look out for a line.
	Slack away.		Endeavor to send a line.
	The berth you are now in is not safe.		Do the best you can for yourselves; no assistance can be given.
	Hold on until high water.		Lookout will be kept on the beach all night.
	Remain by the ship.		Lights or fires will be kept at the best place for coming on shore.
	Quit the vessel as soon as possible.		Keep a light burning.
	Do not quit the ship until the tide has ebbed.		I must abandon the vessel.

	I am on fire.		Want pilot; can one be obtained? (Answer, "*Yes*" or "*No.*")
	I am sinking.		Enquires Name of Signal Station.
	Want assistance; mutiny.		Repeat your signal, or place it in a more conspicuous position; it is not understood.
	Want immediate medical assistance.		Signal not understood, although the flags are distinguished.
	Want boat immediately.		I cannot make out the flags.
	Want a steam tug.		Assent—Yes.
			Negative—No.

ADDITIONAL SIGNALS ADOPTED BY THE UNITED STATES SIGNAL SERVICE FOR THE COASTS OF THE UNITED STATES MADE WITH THE LETTERS AND FLAGS, BUT NOT TO BE FOUND IN THE INTERNATIONAL CODE SIGNAL BOOK.

* * * * * * *

The following additional signals do not appear in the International Code, but are added signals and meanings, adopted for the coasts of the United States, and to be used on occasions of shipwreck, danger, or distress. The letters and flags used are the letters and flags of the International Code.

It being ascertained that the vessel has and can use the International Code, and it being desired to use any additional signals, as given in this paper, the following signals must be shown.

Very great care must be had by Shipmasters, Signal Service men, and others that there may be no mistake about these signals:

Have you the Signal Service Sea-coast Danger or Distress Code of Signals, and do you know how to use them?

Yes; we have the Signal Service Sea-coast Danger or Distress Code of Signals, and know how to use them.

If no Signal is made in answer to Signal P. W., as given above, or it is answered that it is not understood, haul it down, show the flags B. K., which means Attention! International Code, and as soon as it is answered as understood, go on signaling, using the signals of said code.

If Signal W. T. (given above) is made in answer to Signal P. W., then any of the following signals and messages under Section 2 may be sent or exchanged:

JC Lookout will be kept on the beach all night. Hold on until daylight; will then send on board life-saving apparatus.

JR Endeavor to send a line by boat, cask, or spar.

LQ Beach where people are assembled, or as near there as possible.

MJ Haul away.

NB Make the tail-block or the end of this line fast to the lower mast, well up. If masts are gone, then to the best place you can find; then cast off the shot-line; see that all is clear, and show signal by flag or lantern to the shore.

NL Make the hawser fast about two feet above the tail-block or hauling line; see all clear, and show signal by flag or lantern to the shore.

PV Cannot comply with last signal.

VH	Violent storm on New England coast to-morrow.
VJ	Violent storm on middle Atlantic coast to-morrow.
VK	Violent storm on south Atlantic coast to-morrow.
VL	Violent storm on Gulf coast to-morrow.
VM	Violent storm on the lakes to-morrow.
VN	Cyclone in West Indies, moving towards the Florida coast.
VP	Cyclone in West Indies, moving towards the Gulf coast.
VQ	Cyclone moving up the Atlantic coast; not safe to leave port.
VR	Northwest gales on the middle Atlantic and New England coasts to-morrow.
VS	Southerly gales on the New England coast to-morrow.
VT	Northwest gales on New England coast to-morrow.
VW	Northwest gales on the Gulf coast.
RD	Very severe norther in west Gulf.
RF	Easterly gales on the lakes to-morrow.
RG	Heavy snow.
RH	Snow and sleet.
RJ	Freezing weather.
RK	Fair weather.
RL	Very cold and high northwest winds.
RM	Fair weather; light winds.
RN	Light variable winds.
RP	Light southerly winds.
RQ	Light easterly winds.
RS	Light westerly winds.
RT	Light northerly winds.
RV	Light rains but no storm.
RW	What winds are expected ?
SF	No change probable during next two days.
SG	Weather unsettled; changeable.
SH	Storm central in the Gulf of Mexico; will reach the Atlantic to-morrow.
SK	Storm central in lower Mississippi valley, moving eastward.
SL	Storm central in northwest, moving eastward.
SM	Storm central over upper lakes; not safe to sail from north Atlantic ports.
SN	Storm on south Atlantic ports; not safe to leave northern ports.
SP	Severe storm in Saint Lawrence valley; will be followed by high northwest winds on the Atlantic coast to-morrow.
SQ	Fair weather and high westerly wind to-morrow on middle Atlantic coast.
SR	Fair weather and westerly wind on New England coast to-morrow.
ST	Severe storm to-morrow on the north Pacific coast.
SV	Not safe to sail from San Francisco to-day.
SW	Storm on central Pacific coast to-morrow.
TB	Storm on south Pacific coast to-morrow.
TC	Barometer will fall rapidly to-night, with easterly gales.
TD	Barometer falling rapidly.
TF	Barometer rising rapidly.
TG	Southerly gales.
TH	Easterly gales.
TJ	Westerly gales.
TK	Northerly gales.
TM	Make safe harbor before night; dangerous winds.
TN	Do not expect fair weather.
TP	Do not sail until after next report.
TQ	Storm threatening.
TR	What are the indications for to-morrow ?
TS	How is the weather south ?
TV	How is the weather north ?
TW	Can we sail south ? Answer "Yes" or "No."
VB	Can we sail north ? Answer "Yes" or "No."
VC	Can we pass Cape Hatteras before a storm ? Answer "Yes" or "No."
VD	Is it safe to leave the Gulf ? Answer "Yes" or "No."
VF	Can we sail from Port Eads with safety ? Answer "Yes" or "No."
VG	Can we cross the Gulf ? Answer "Yes" or "No."

DISTANCE SIGNALS.

Distance Signals are sometimes used when, in consequence of remoteness, or the condition of the atmosphere, it would be impossible to distinguish signals made with the Code flags in the usual way. They should on all occasions be used by ships when it is found that the Code flags cannot be read with clearness and certainty.

The characteristic of the distance signal is the ball, one ball at least appearing in every hoist of the distance Code, the other symbols being pennants, or square flags of any color.

By observing the arrangement of the Distance Signal Code in the adjoining table, a knowledge of the various combinations may soon be acquired, for example:

The *first column* (B to H) contains all the combinations having the ball or balls uppermost in the hoist.

The *second column* (J to P) contains all the combinations having the ball or balls separate in the hoist.

The *third column* (Q to W) contains all the combinations having the ball or balls lowest in the hoist.

Table illustrating the Distance Signals.

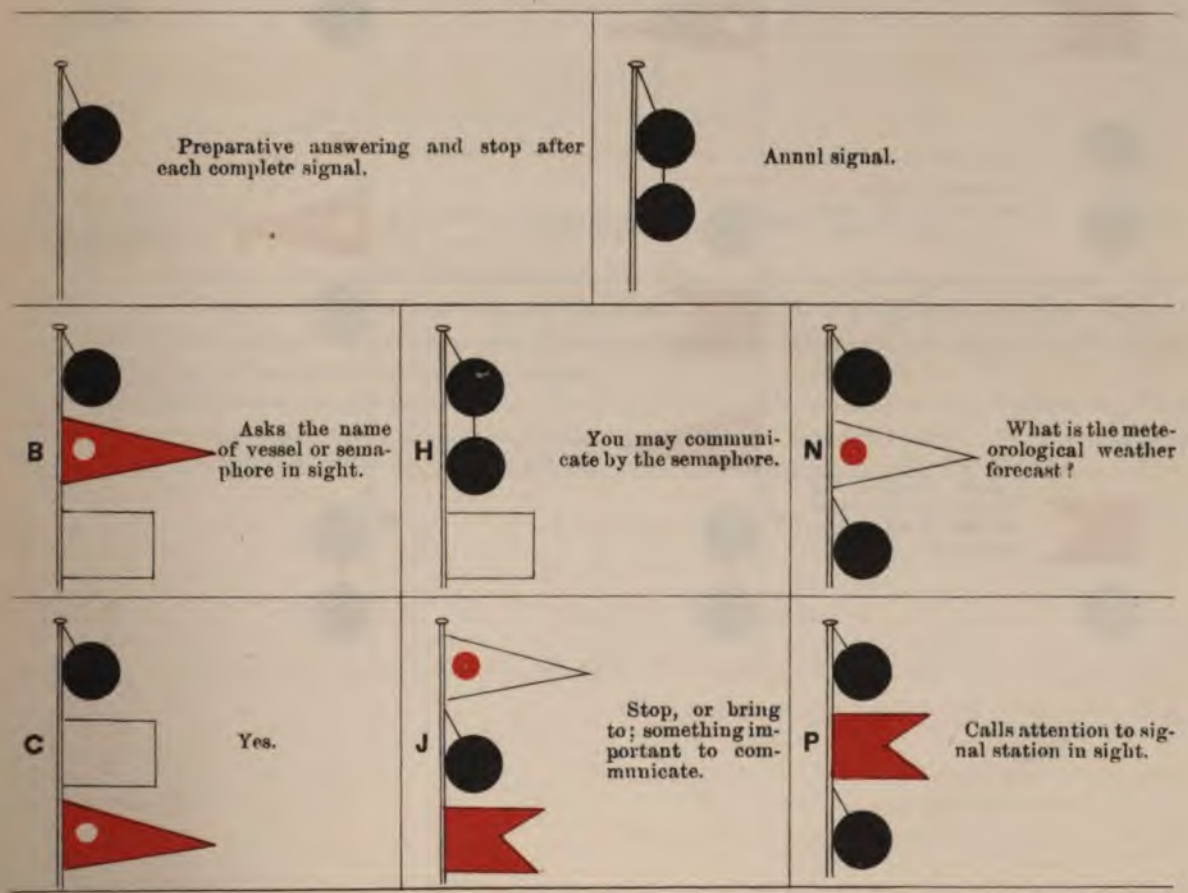


Table illustrating the Distance Signals—Continued.

D		No.	K		Have you any telegrams or dispatches for me?
Q		Vessel asks for orders by telegraph from owner, Mr. — . at.	F		Repeat signal, or hoist in a more conspicuous place.
L		Want a pilot. Can I have one?	R		Report me by telegraph to my owner, Mr. —, at.
G		Cannot make out your flags, come nearer, or make distance signals.	M		Want a tug. Can I have one?
S		Send the following message by the signal letters through the telegraph.	T		Send the following message by the signal letters through the telegraph.
V		—.—.—.—.—	W		—.—.—.—.—

In addition to these, the following distance signals composed of two symbols have the special signification annexed :

 You are running into danger.	Short of provisions; starving.
 Fire or leak; want immediate help.	 Aground; want immediate assistance.

SEMAPHORES.

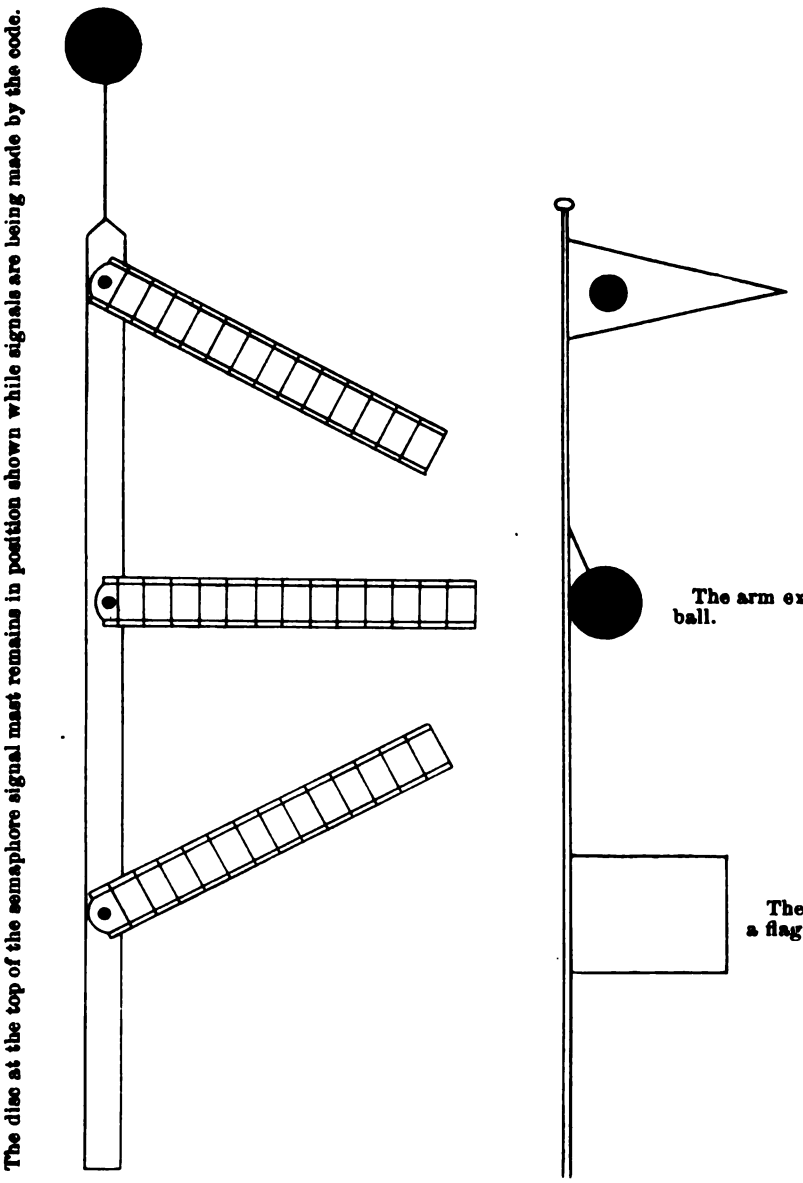
There are many semaphores established on the French, Italian, Portuguese, and some on the Spanish and Austrian coasts, where only the international Code of Signals are now used. Where practicable these semaphores have means of communicating by telegraph with each other and with the chief metropolitan lines and foreign stations.

Passing ships are able to exchange communication with the semaphores, and when required their messages are forwarded to their destination according to the fixed tariff. On the coasts of Great Britain there are signal stations which offer the same facilities to passing vessels.

The Semaphore and corresponding Distance Signal.

SEMAPHORE SIGNAL.

DISTANCE SIGNAL.



The disc at the top of the semaphore signal mast remains in position shown while signals are being made by the code.

The arm of the semaphore signals pointing downwards has the same meaning as the pennant.

The arm extended horizontally represents a ball.

The arm pointing upwards represents a flag.

The semaphore signals must be read off as distance signals as shown above.

UNITED STATES SIGNAL SERVICE STATION AT LIFE-SAVING STATIONS.

The following flag, thus—

shown over any station-number flags, will be used to designate a full signal station of the United States, from which any communication received will be transmitted by telegraph to destination. This flag will always be hoisted above the station-number flags when the station number of such full station is shown, thus:

ANY MESSAGE signaled by the International Code, as adopted or used by England, France, America, Denmark, Holland, Sweden and Norway, Russia, Greece, Italy, Germany, Austria, Spain, Portugal, and Brazil, received at these telegraphic signal stations, will be transmitted and delivered to the address on payment, either at the station or at place to which addressed, of the telegraphic charge. All messages received from or addressed to the War, Navy, Treasury, State, Interior, or other official Department at Washington, are telegraphed without charge.

Ships' official numbers, shown and recognized at stations thus designated, are reported to Washington by telegraph.

The flag flown below the United States national colors indicates a full signal station connecting by telegraph, but not a life-saving station.

General messages to be telegraphed will be taken only at stations flying either three flags, as first given above, or the American flag with the distinctive "Signal Service Flag," as above stated.

The distinctive Signal Service flag flown ALONE indicates a United States Signal Service station anywhere, not necessarily, however, connecting by telegraph.

Cautionary, Storm, and Direction Signals of the Signal Service.

To adapt the signals to the varying interests of the maritime community, the new system will take into consideration the fact that westerly winds of high velocity with clearing weather are less dangerous than those from easterly quarters with freezing weather.

Along the Atlantic, Pacific, and Gulf coasts, and on the Great Lakes, there will be displayed, as storm conditions may demand, day signals of two kinds:

1. A cautionary signal, a yellow flag with a white center, will indicate that the winds ex-

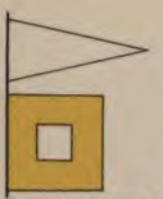
pected are not so severe but well-found and seaworthy vessels can meet them without great danger.

2. A storm signal, a red flag with a black center, will indicate that the storm is expected to be of more marked violence.

In order to afford the public as exact information as possible regarding the relative position of the storm and the winds expected, two pennants will be displayed. A red pennant will indicate that the winds are to be easterly, that is, from northeast to *south*, inclusive, and that the storm center is approaching. The white pennant will indicate westerly winds, that is, from *north* to southwest, inclusive, and that the storm center has passed. While it is intended that the pennant shall indicate positively only whether the winds will be easterly or westerly, yet, in order to give still more definite information, the red or easterly pennant will be displayed above the cautionary or storm signal for winds from the northeast quadrant and below for winds from the southeast quadrant. In like manner, the white pennant, while indicating westerly winds alone, will show by its position above the cautionary or storm signal that northwesterly winds are probable, or, by being below, that they will be from the southwest quadrant.

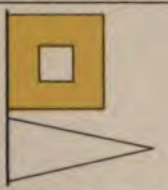
In view of the difficulty of varying night signals, they will not distinctively show the force, but indicate the wind direction only; a red light for easterly winds and a red and white light for westerly winds. Night signals are not displayed on the Pacific coast.

CAUTIONARY AND STORM SIGNALS, ATLANTIC, PACIFIC, AND GULF COASTS OF THE UNITED STATES.

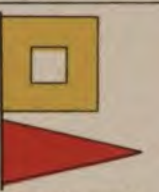


Northwesterly winds.

Northeasterly winds.



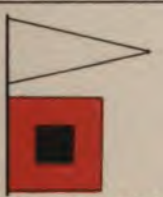
Southwesterly winds.



Southeasterly winds.

Cautionary signals.—Winds expected are not so severe as to be dangerous to well-found and seaworthy vessels.

FLAGS, 8 FEET SQUARE. PENNANTS, 5 FEET HOIST, 12 FEET FLY.



Northwesterly winds.

Northeasterly winds.

Southwesterly winds.

Southeasterly winds.

Storm signals.—Winds expected are of such a character as to be dangerous to all classes of vessels.

Night signals.—Red light, easterly winds; red and white lights, westerly winds.

WEATHER SIGNALS.

Clear or fair. *Rain or snow.* *Temp. signal.* *Cold wave.*

No. 3 refers to temperature. When placed above No. 1 or 2, it indicates warmer weather; when placed below No. 1 or 2, it indicates colder weather; when not displayed, the indications are that the temperature will remain stationary. No. 4 is not displayed unless a temperature of 45 degrees or lower is expected. When No. 4 is displayed, No. 3 is always omitted.

THE HULL AND RIG OF VESSELS.

The term *rig*, when applied to vessels, generally refers to the number and kind of masts and style of sails that are carried, but the term is also sometimes used indiscriminately to designate the class of hull or the complete vessel in her entirety. Thus it may be said of a vessel that she has a ship's hull with the rig of a brig, meaning that the hull may be of a build that does not correspond with the style of rig. In such cases the rig prevails over the hull in giving the name of the vessel's species, and she is called a brig; but in some compound names, as "*scow-schooner*," the word "*scow*" expresses the build of hull and the word "*schooner*" the style of rig.

A gradual change resulting from the inventions and improvements made during the past century has been going on in the rig of American vessels as well as in those of other countries. Some new rigs have been found to be better adapted to some waters, and changes have been made to suit the increased size of vessels, which have proved to be more serviceable in certain trades.

But while old rigs have been abandoned and new ones added, the names applied to them have not in all cases been uniform throughout the country.

Some localities may adopt certain rigs as more desirable for certain trades, but it is important that they should be designated by the same nomenclature at all the ports. While recognizing the styles of rig where best known and adopted, in order to counteract any tendency to use local names, more especially for new rigs, a brief description of those most generally known and acknowledged is inserted here, and diagrams intended to illustrate the different styles of rig now in use are subjoined.

SHIP.

Aside from the generic name of *ship*, which applies to all species of vessels, we have the term applied to the *rig* of the largest class of sailing vessels, which has for a long period been known among sailors to designate a three-mast vessel having lower masts, topmasts, and topgallant masts with yards (square-rigged) on each mast, and having a bowsprit.

The term "lofty ships" was formerly applied to all classes of square-rigged vessels.

When the large, modern merchant ships began to be built the double topsail rig (which was an American invention) was introduced, and more latterly the four-mast ship, now quite common, for the long iron ships built in Great Britain. The ship carrying four masts is generally fore-and-aft rigged on the after mast.

In the diagrams, No. 1 shows the modern four-mast, double-topsail ship rig, and No. 2 represents the old style whole-topsail rig.

BARK.

The bark or *barque* (from the Latin *barca*) is a rig similar to that of the ship, excepting that it has only fore-and-aft sails (no yards) on the mizzen mast.

Barks are commonly smaller than ships, although some vessels of 1,000 to 1,500 tons are so rigged for sake of economy. They generally carry double topsails.

The diagram No. 3 exhibits the ordinary modern bark rig.

BARKENTINE, ALSO SPELLED BARKANTINE AND BARQUANTINE.

The term is derived from the word "barque," and properly signifies a small bark.

The barkentine is fitted with three masts, square-rigged with yards on the foremast only, and fore-and-aft sails on the main and mizzen masts.

Barkentines are generally constructed with great length in proportion to their breadth, and on the lakes are built to suit the peculiar navigation of those narrow waters.

Diagram No. 4 shows the rig of the ordinary barkentine, as known in American waters.

BRIG.

According to Admiral Smyth, this word is from the Celtic, and was first applied to ferry-boats, meaning "passage over the water." The brig is now a two-mast square rigged vessel. There are several kinds of brigs:

(1) The *full-rigged brig*, which is a rig nearly similar to that of the *snow* of former times, having fore and main lower masts, topmasts, and topgallant masts, and yards on each, with or without a square mainsail, and carrying also a trysail.

(2) The *hermaphrodite* or *half brig*, which is a vessel with a brig's foremast and a schooner's mainmast, square-rigged forward and fore-and-aft rigged aft. Diagram No. 5 represents the full-rigged brig, and No. 6 the hermaphrodite brig.

BRIGANTINE.

This word, which is probably a diminutive of "brig," is employed in the French to designate the fore and-aft mainsail used in small vessels.

The brigantine rig (or brig-schooner) is similar to the hermaphrodite, excepting that brigantines carry a light topsail on the mainmast above the large fore-and-aft mainsail. The term is variously applied by seamen of different European nations to a peculiar sort of vessel of their own marine. At some ports on the Pacific coast a hermaphrodite brig rigged with a large three-cornered mainsail without a gaff but an overlapping fore-and-aft topsail whose sheet hauls out to the boom is improperly called a brigantine. The brigantine rig is becoming quite rare in American waters.

Diagram No. 7 is designed to illustrate a brigantine under sail.

SCHOONER.

A name applied to vessels of fore-and-aft rig of various sizes. Schooners have two or more long lower masts without tops, and are sometimes fitted with light square topsails, especially at the fore; but these are giving way to the fore-and-aft gaff topsails, which are better adapted to the American coast.

The schooner used to be the rig chiefly for small vessels, but some of the more modern schooners measure 800 and 1,000 tons, and carry three and four masts.

In the diagrams, No. 8 represents the *topsail schooner* of two masts and No. 9 the *fore-and-aft schooner* of four masts. No. 11 gives a view of the ordinary American *pilot boat*, which, in most of the ports, is a small, two-mast fore-and-aft schooner-rigged vessel with pointed ends, but with suitable beam for sailing and working to windward.

SLOOP.

The sloop is a vessel with only one mast, and a bowsprit carrying a fore-and-aft mainsail and jib, which, being set on the forestay, is called the foresail. The sloop is one of the oldest style of vessel known to the trade of this country, and is (with some local variations in the cut of sails) a rig that is more or less employed in the commerce of the entire globe. Diagram No. 12 shows the sloop rig.

CUTTER.

A small sloop-rigged vessel, sharp built, with a straight bowsprit running out parallel with the deck, and having large sails. She carries a fore-and-aft mainsail, stay foresail, flying jib, and topsail. Large cutters, 400 to 500 tons, have been constructed for naval use and made to carry yards with every sail that can be set on one mast, even to sky sails, moon-rakers, star-gazers, etc. The modern cutter-yacht generally carries a flying gaff topsail. The name cutter applies as much to the sharp build of the vessel's hull as to the particular rig. Diagram No. 13 affords a view of the cutter.

LUGGER.

Luggers are vessels generally with one mast (though sometimes two or three), having quadrilateral or four-cornered fore-and-aft sails bent to a hoisting yard, the luff being about two-thirds the length of the after leech. The French *chasse-marée* or lugger, used for fishing and coasting purposes, carries two or three masts and is of 200 to 300 tons capacity. In this country the lugger is generally a small vessel with one mast, used for the oyster trade on the Mississippi River and adjacent waters. The diagram No. 14 represents one of these vessels navigated by one man.

LATEEN.

The lateen rig is similar to the lug rig, excepting that the sail is triangular, a long yard which hoists obliquely to a stout mast forming the luff.

The lateen rig is much used by small craft in the Mediterranean and in some of the larger size which have more than one mast. The sails brail up in case of need.

In New Hampshire, and waters in that vicinity, there is a long, shallow boat decked the entire length and having a "cuddy" or small cabin. This vessel, which is flat-bottomed and uses a lee board, is called a gondola (gundlow) and carries a large picturesque lateen sail hoisted on a yard sometimes 60 to 70 feet in length. On the Pacific coast the lateen rig is in common use for pleasure craft and small fishing vessels. Diagram No. 15 represents one of the latter class.

SCOW.

The scow is a vessel used in the shoal waters of nearly all the States, but principally on the lakes.

Scows are built with flat bottoms and square bilges, but some of them have the ordinary schooner bow. They are fitted with one, two, and three masts, and are called *scow sloop* or *scow schooner*, according to the rig they carry. Some of them carry bowsprits. The diagrams No. 16 and No. 17 represent one of each class of scow. The distinctive line between the scow and regular-built schooner is, in the case of some large vessels, quite obscure, but would seem to be determined by the shape of the bilge, the scow having in all cases the angular bilge instead of the curve (futtock) bilge of the ordinary vessel.

CAT.

A rig supposed to be derived from the Brazilian catamaran that allows of one sail only, an enormous fore-and-aft mainsail spread by a boom and gaff and hoisted to the one mast stepped near the stem. The cat rig is much employed on Long Island Sound for small coasting and fishing vessels. It is also a favorite rig for pleasure vessels, being easily handled, but is not suited to a heavy sea and rough weather. Diagram No. 18 exhibits the cat rig.

SHARPIE.

A vessel of 20 to 40 feet in length, used by the oystermen of Connecticut and New Jersey, and also for general pleasure purposes. The sharpie is built sharp, with a flat bottom, and carries a center-board. The rig of the sharpie is peculiar and the vessel might be termed a cat-rigged schooner. The diagram No. 19 shows the rig of the Connecticut *sharpie*. The Ohio *sharpie*, used on the lakes for fishing purposes, has the same rig, excepting that they generally carry gaffs.

YAWL.

The yawl is properly a ship's boat, resembling the pinnace. It is more commonly propelled by oars, but there is a certain rig applied to them by a British customs act known as the yawl rig, and in use by some American as well as foreign yachts.

It resembles the cutter rig, except that it has a jigger-mast at the stern, which carries a small lug-sail, the main boom traversing just clear of it; many small fishing boats on the lakes now have this rig. The diagram No. 20 illustrates the yawl rig.

CATAMARAN.

A pleasure boat constructed on the plan of the vessel of that name used on the Brazilian coast. The American catamaran has a double hull and carries the cat rig. The catamaran of the Madras and Ceylon coasts is made of three logs 20 to 30 feet long, 2 to 3 feet apart, secured by spreaders and lashings. They carry large sails and are very fast sailers. Diagram No. 21 is designed to represent the catamaran as rigged on the Atlantic sea-board.
